How to Answer Children's Fall Questions

What is fall?

Some people use the word Autumn for Fall. Fall or Autumn is one of the four seasons: Winter, Spring, Summer, and Fall. Autumn is the season between Summer and Winter. The season when children go back to school is unofficial end of summer and beginning of the Fall. Seasonal colors are red, yellow, orange, brown, and black.

What happens in fall/autumn?

Fall is always associating with leaves changing their color. They change to red, yellow, orange, and brown before fall to the ground.

Deciduous and Evergreens are two types of trees. Deciduous tree leaves change color, but Evergreens do not. Christmas trees are evergreens.

Why do the leaves change color and drop from the trees?

If we prefer to reply in simplest way – the lack of food and water will be the answer. If we go to the details, we can explain to the little ones that leaves contain chlorophyll which makes the leaves green. They also contain xanthophyll which makes the leaves look yellow and carotene which makes the leaves look orange. The leaves are green during the Spring and Summer because of photosynthesis. Photosynthesis process is how the leaf gets food and water and made oxygen.

And the chlorophyll gets light from the sun and water from the ground, turns it into food, and stores it in the leaf...
